Carving of v-shaped letters

Text gives you the much coveted classic v-shaped look! Perfect for **carving in marble**, stone or wood

Scantech

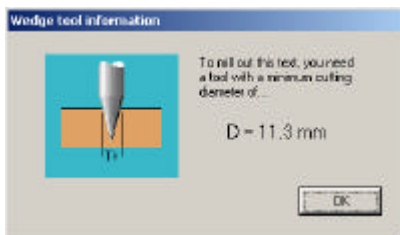

Scantech is a Danish manufacturer of high accuracy 3D laser scanners and Copying CAD/CAM. Our experience is based several hundreds installations world wide in **Copy milling** and **Reverse Engineering**.

Let your modern CNC -machine replace the time consuming engraving on your manual pantograph machine. Carving of classic v-shaped letters on your 3-axis CNC -machine using any TrueType font in Windows. Microsoft's TrueType text fonts are today a leading standard for letters and are available from many different suppliers in virtually any typeface. There are thousands of different designs available from e.g Microsoft and BitStream

Features

Windows word like text editor. Support most TrueType text fonts from Windows. Select outlined or v-shaped text carving.

Build-in language support for English, Italian, German, and Danish. Use a pointy carving tool. Post processor in standard G-code format.

Step by step

1. Type the text
2. Set the size
3. Calculate the tool path
4. Send the post processed file to your CNC -machine
